MicroVision (MVIS) Report

Compiled for Walt Scudder — March 2026

Prepared by Jeffrey via Aesthetic Computer · Source: family email archive (2015–2026) + current market data

Current State of MVIS (March 2026)

> **Stock Price:** $0.61/share · **Market Cap:** ~$190M · **Analyst Target:** $2.50 (Strong Buy) · **Ownership:** 27.5% institutional, 9.8% insiders, 62.7% retail

Recent developments:

- New CEO **Glen DeVos** executing "Pivot to Profit" strategy
- Acquired **Luminar Technologies' LiDAR assets** (Iris + Halo sensors) for $33M — completed Feb 2026
- Raised **$43M via senior secured convertible notes** to accelerate acquisition synergies
- CEO, directors, and executives **buying MVIS stock** (March 2026)
- Partnerships with **Anduril** (defense), **ZF** (auto Tier 1), **NVIDIA** (AI/compute)

Latest News Timeline (Dec 2025 – Mar 2026)

2026-03-16 · **Insiders Buy $310K in MVIS Stock**
All executive officers and U.S. board members committed to purchase shares at **$0.5322/share** — direct purchases from the company, not open market. CEO Glen DeVos led the effort. Source

2026-03-05 · **D. Boral Capital Downgrades MVIS to Hold**
Downgrade from Buy to Hold, citing "uncertainty around near-term sales growth and continued spending pressures." Stock fell ~19% post-earnings.

2026-03-04 · **Q4 & Full Year 2025 Earnings**
Q4 revenue: **$0.2M** (vs $1.7M prior year). Full year 2025: **$1.2M** (vs $4.7M in 2024). Net loss included $29.4M impairment charge.
2026 revenue guidance: $10–15M — mostly industrial, with balance from automotive (includes Luminar streams).
Cash burn for 2026: $65–70M. Cash on hand: **$74.8M**.
Transcript · Seeking Alpha

2026-02-25 · **CEO Fireside Chat — "LiDAR 2.0" Strategy**
Glen DeVos outlined rationale for two acquisitions and the "LiDAR 2.0" transformation with expanded defense push. Source

2026-02-24 · **$43M Convertible Notes Issued**
Senior secured notes to defer repayment obligations and accelerate Luminar + Scantinel integration. Source

2026-01-27 · **Luminar Assets Acquisition ($33M)**
Acquired Iris + Halo LiDAR sensor IP, inventory, key engineering talent, and select commercial contracts. Source

2025-12-16 · **First MOVIA L Shipments — EU Defense OEM**
Initial order for MOVIA L sensors with integrated software shipped. Repeat orders continuing in 2026. DeVos: suited for "mission-critical systems, whether protecting lives on the battlefield or cargo in industrial transport." Source

2025-11-10 · **Scantinel Photonics Acquisition (FMCW LiDAR)**
Acquired 1550nm FMCW ultra-long-range LiDAR tech + team in southern Germany. Targets commercial vehicles.

Product Roadmap

- **MOVIA S** — next-gen industrial sensor, production launch **Q4 2026**
- **FMCW ultra-long-range** — roadmap via ex-Scantinel team (Germany)
- **MOVIA L** — shipping now to EU defense OEM, repeat orders ongoing
- **MAVIN** — long-range ADAS sensor, integrated with **NVIDIA DRIVE** platform

Peter's MVIS Blog (Latest)

- **Aug 8, 2025** — *"Building a skyscraper"* — Compares MVIS to a $200M Miami lot: deep underground work invisible for months before the structure rapidly rises.
- **May 20, 2025** — *"Brain Trust compares Microvision to a biotech"* — At a pre-investor dinner in Redmond, attendees likened MVIS to biotech: no current earnings, but underlying assets carry huge potential.
- **Apr 21, 2025** — *"Do Not Sell."*

AIM Intelligent Machines — Takeover Theory

> **Walt's call:** AIM Intelligent Machines will take over MicroVision. They now share office space.

AIM Intelligent Machines retrofits heavy earthmoving equipment (excavators, dozers, trucks) to operate autonomously using LiDAR + AI. They're DCVC-backed with defense contracts.

Why the fit is almost too clean:

- AIM is in **Bellevue/Monroe, WA** — a few miles from MVIS in **Redmond, WA**
- AIM needs compact, affordable LiDAR for harsh outdoor environments — MVIS makes exactly that
- MVIS's MAVIN (long-range) + MOVIA (short/mid-range) at ~$250/unit fits AIM's cost model
- Overlapping defense angle: AIM defense contracts + MVIS/Anduril partnership
- MVIS at ~$190M market cap is very acquirable
- **Shared offices** = deeper than a partnership (joint engineering, due diligence, or pre-acquisition integration)

Grok AI Blind Valuation (March 20, 2026)

Grok was prompted to value a hypothetical company matching MVIS's exact capabilities *without naming MicroVision* — avoiding biased press coverage per Peter's technique.

> **Market Cap Estimate:** $2–5 billion (bull case: $5–10B by 2028)
> **NED Licensing Deal:** $200–500 million
> **Implied Price Target:** $6–$16/share
> **Short killer:** A special dividend of $2 from NED licensing would devastate shorts

Market Opportunity (Grok's Numbers)

Segment	2025 Market	2030 Projection	MVIS Revenue Potential
Automotive LiDAR (ADAS)	$1.2–1.9B	$9–25B	$500M–$2B (5–10% share)
Industrial LiDAR (forklifts, heavy equip)	$3–8B	$6–13B	$200–500M
AR Near-Eye Display	$2.2B	$6.7B	$300–800M

Comparable Companies

Company	Focus	Market Cap
Hesai Group	Auto/Industrial LiDAR	~$3.8B
Ouster	Multi-sector LiDAR	~$1.3B
Aeva Technologies	Automotive LiDAR	~$0.9B
Himax Technologies	Display tech (AR)	~$1.7B

Kopin Corporation	Micro-displays for AR	~$0.4B
MicroVision	**LiDAR + NED + AR**	**~$0.19B**

Peter's AI search tip:

> *"If you tell Grok to eliminate certain biased sources it will do that, and the answers are often very different... as Microvision has gotten a lot of bad/biased press, eliminating that will give a better answer."*

Reverse Chronology — 11 Years of MVIS Research

2025 — ANDURIL, ZF, NVIDIA PARTNERSHIPS

2025-07-11 · **MicroVision Retail Investor Day Town Hall**
Replay: Reddit thread

2025-04-05 · **CoPilot Analysis: Anduril + ZF + NVIDIA**
PDF analyzing MVIS's defense/auto/AI partnerships. Download PDF

2024 — INTERACTIVE SPREADSHEET ANALYSIS

2024-10-09 · **MVIS Lidar Spreadsheet v2 (Autos + Industrial Robots)**
Interactive spreadsheet with user-adjustable variables. View online

2024-03-17 · **MVIS Lidar Spreadsheet v1**
"All the cells highlighted are variables where users can input their own ideas and it will do the calculations."

2021 — TD AMERITRADE REVIEW

2021-11-17 · **Buy Back Recommendation**
Jeffrey sold 1,100 shares at avg $13.54 ($14,894). Walt urged rebuy at $8.62. Projection: buy at $9, sell at $40 = $34,100 profit.

2020 — AMAZON BREADCRUMBS & VOLUME EXPLOSION

2020-05-09 · **Trading Volume Explosion**
842M shares traded (56x YoY). 6-day volume = 5x the entire 130M float. "My gut tells me something big is going on."

2020-01-07 · **Amazon Breadcrumbs — The Salmon Platter**
Walt discovered MVIS data sheet image matched a Whole Foods listing. Peter confirmed: Amazon engineer reacted with "shock and startle" about the laser projector in Alexa. Peter's blog post

2019 — PPS MODELING & BULL/BEAR DEBATE

2019-03-10 · Future PPS Calculations
Walt's bull case: 1B units, PE 14, 30%+ margins. Chad Zawistowski's bear case: 35M units, PE 5, $1.70 target. Known deals: $25.2M contract (HoloLens 2), $10M display-only license.

2018 — "MSFT AND AMZN ARE THE MYSTERY CUSTOMERS"

2018-08-02 · Q2 CC Analysis (via Roger Collamati)
"I personally think two of the big ones MVIS has been working with are MSFT and AMZN." Roger: "Hang in there."

2017 — ANALYST REPORTS & CHINESE SMARTPHONES

2017-07-26 · VOGA V Phone (MVIS Engine Inside)
"I think this phone with the MVIS engine will become very popular in China." Peter's review

2017-03-23 · RDI Bullish Report + Apple/STM Rumors
"If rumors about STM having large order from Apple for a 3D sensor that includes Microvision's product prove true — this stock could be a real winner."

2016 — "BOTTOM OF THE FIRST INNING"

2016-03-08 · Q4 CC: Baseball Analogy
"MVIS has a runner (Sharp) on first and another runner (Sony) on second with no outs." Tracked Robohon, Xperia Agent, Foxconn buying Sharp.

2016-01-06 · CES 2016: Sony MPCL1 + Ford HUD
MVIS tech at CES through Sony, Celluon ($299–$450 projectors), Ford HUD. You gave me the Sony MPCL1 for Christmas.

2015 — THE BEGINNING

2015-07-27 · Roger Collamati: "Why MicroVision?"
"Why this company will be the next big investment to have." MVIS at $3.40. Roger's 15-person distribution list.

2015-06-09 · Peter's Blog: "Why MicroVision? Because THIS."
The founding thesis: consumers demand bigger screens, PicoP projection is the answer. This idea evolved through interactive displays, HoloLens, LiDAR, and defense tech over the next decade. Peter's MVIS Blog
