# Dis-order

Dis-order is a performance, communal ritual, and a family drama that asks what forces move through us when we enact an ancient spring rite, and what is left unspoken when we gather around the table.

Staged a la Judy Chicago's *The Dinner Party*, the piece references the Passover seder, Greek mythology, and Pina Bausch's *Rite of Spring* to examine the performance of ritual and the rigidity of roles and stories within families, communities, and institutions.
