# QWERTY Waltzes

three waltzes for one notepat keyboard, left hand and right

by @jeffrey with Claude · aesthetic.computer · November 2026

**How to read a card.** Each box is one bar of three beats. The red word is the chord. The big letters are the right hand: one key per beat, and a dash means keep holding the last key. The blue line is the left hand: press the single key on beat one, then press the two keys together on beats two and three. Letters are notepat letters: `c d e f g a b` are the low octave, `h i j k l m n` the high one, and the sharps sit one row up (`r` is G♯, `w` is F♯ low, `u` is F♯ high, `o` is G♯ high). Count "ONE two three" and let the left hand do the waltz; the right hand only ever moves to a neighbour or a chord tone.

**Learning order.** Left hand alone until the bass-chord-chord rocks without looking. Then right hand alone, singing the letters. Then together at half speed. Menu Band plays each score when you open its `.mbscore`; play along with the file, then without it.

# Home Row Waltz

D minor, home row only · $\frac{3}{4}$ · 120 bpm · 16 bars

*home row only: left hand d f g a, right hand h j k l, and one climb to ; at the end*

top line = chord · middle = right hand, one letter per beat, – holds the note · bottom = left hand: bass on 1, then the two-key chord on 2 and 3
