Re: Technical Documentation Services Quote for UCLA Social Software

Dear Jinwoo Park,

Aesthetic Inc. is pleased to submit the following quote for technical documentation services in support of the UCLA Social Software program, co-directed by Professor Casey Reas and Professor Lauren Lee McCarthy.

Scope of services. Aesthetic Inc. will author and deliver technical documentation for the UCLA Social Software program over the 2026 academic cycle, including written specifications, reference material, and architectural descriptions of the runtime, language, and instructional tools used by students and faculty, together with an analysis of the software in production use across UCLA Design Media Arts and a survey of the open-source and proprietary stacks on which that practice depends. Deliverables will be furnished in written form and published on the Social Software program website at sosoftware.arts.ucla.edu for ongoing reference by students, faculty, and the public. No software license, hardware, or resalable good is included; the engagement is services-only.

Description	Amount (USD)
Technical documentation services — 2026 cycle (flat fee)	\$1,200.00
Total	\$1,200.00

Terms. Flat fee, inclusive of all deliverables described above. Quote valid for sixty (60) days from the date above. Payment by UCLA standard vendor terms upon completion or on an agreed milestone schedule.

Please let us know what additional documentation UCLA Purchasing needs to complete vendor onboarding for Aesthetic Inc. — we are happy to furnish a W-9, certificate of insurance, or any supplemental forms required. Scope can be refined in writing before engagement.

Thank you for the opportunity to support the Social Software program.

Aesthetic Inc. Issued for vendor onboarding — April 22, 2026
