

Special Sign

Live Spatial Version

WORKING TITLE — PROVISIONAL

Credit: Jeffrey Alan Scudder / Aesthetic Computer. Alt text: A dark three-dimensional field of twelve colorful sound bodies orbiting a central listener marker.

Six salvaged laptops become one spatial instrument, played from inside the score.

Jeffrey Alan Scudder expands *Special Sign*, his 1:41 composition for twelve moving sound bodies, into a live performance on six aging laptops revived with AC Native. The computers form a distributed instrument across CultureHub LA's surround system. Scudder rotates the entire system, changes its speed and trajectory, and moves individual voices among the machines while the audience sits inside the score. The performance culminates a ten-day residency devoted to rebuilding the fixed recording as a longer form that can change each time it is played. A conversation follows the approximately 30-minute performance.

Public programs

Proposed & awaiting CultureHub confirmation

Performance and Q&A

DATE AND TIME NOT CONFIRMED

Proposed: Thursday, September 24, 2026 · 7:00–8:00 p.m.

The audience sits inside the surround field during the concert and joins a Q&A afterward. A performance livestream is requested; platform and archive status remain to be agreed.

Menu Band Jam

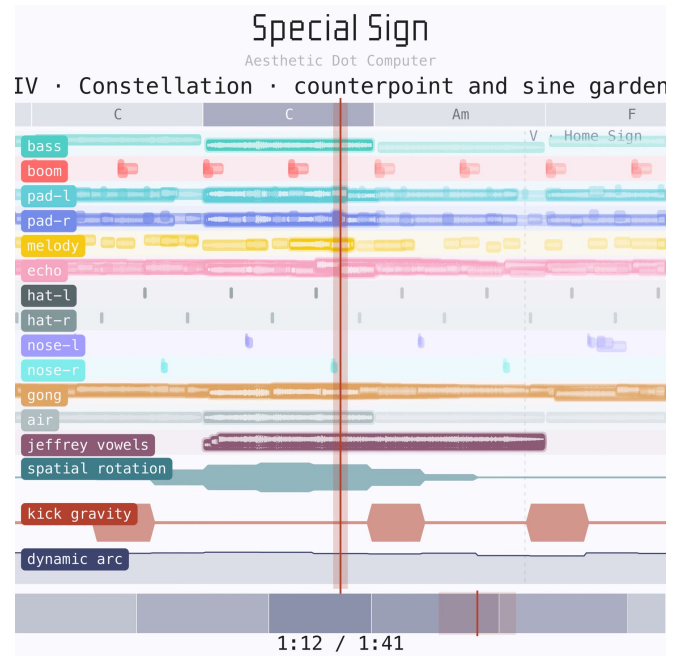

SEPARATE PROGRAM · NOT CONFIRMED

Proposed: Saturday, September 19, 2026 · 2:00–3:30 p.m.

Participants bring a laptop, boot AC Native from a USB stick without changing the computer's disk, and join a group performance. No programming or musical experience is required.
